Samsung SDP-860 Document Camera

This Document Camera is designed to view documents placed under the lens, which will display the paper document to the projector screen, replacing traditional transparency projectors. It functions through software on the PC, using the Doc Cam Viewer icon on the desktop.

Useful Instructions:

1. Turn on Document Camera using power button located on camera base.
2. Open the Doc Cam Viewer software by double-clicking the icon on the desktop.
3. Use the buttons on the toolbar to navigate:
    - Zoom
    - Full Screen
    - Still Capture
    - Video Capture

Common Issues:

- Black screen in the Viewer:
    - Make sure to remove the lens cap.
    - Power the Doc Cam on BEFORE opening the software.
- Document is too dim:
    - Press the Lamp button on the base.

Other Examples:

Other Information:

Visit http://support.boisestate.edu and select Classroom and Lab Technologies to schedule a General Purpose Classroom equipment demonstration.
